WEB DEVELOPMENT

Event Description:

The Full Stack Web Development Challenge is a 2-Day intensive individual technical event designed to test participants' ability to independently design, develop, and present a complete web application.

Participants must build a fully functional web application that includes:

Frontend (User Interface)

Backend (Server-side Logic)

Database Integration

REST API Connectivity

Authentication & Validation

The event evaluates real-time development skills, system architecture knowledge, debugging capability, and independent problem-solving ability.

Team Specification:

1. This is an Individual Event.
2. Each participant must register separately.
3. Registration Fee: ₹ 50. Click Here to Register
4. Participants must bring their own laptops and necessary accessories.

Event Structure (2 Days):

Day 1

1. Inauguration & Problem Statement Release

- Event briefing
- Rules explanation
- Problem statement allocation
- Participants will receive a real-world web application problem.
- Example domains may include:
  - » E-commerce Platform
  - » Student Management System
  - » Appointment Booking System
  - » Inventory Management System
  - » Blogging Platform
  - » Event Registration Portal…etc.

2. System Design & Development Phase – Part 1

Participants must:

- Analyze requirements
- Design database schema
- Plan application architecture
- Set up backend framework
- Develop core frontend structure
- Create initial APIs
- Focus: Structure, Database Design, API Setup, UI Layout.

Day 2

3. Development Phase – Part 2

Participants must:

- Complete backend business logic
- Implement CRUD operations
- Integrate frontend with backend
- Implement authentication (Login/Register if required)
- Add validations & error handling
- Perform testing & debugging

4. Final Submission & Demonstration

Participants must submit:
Public GitHub Repository
Database Schema - README Documentation (Setup & Execution Steps)
Working Application (Localhost Demonstration or Hosted Link)

Final Presentation:

8–10 Minutes Demo
3–5 Minutes Jury Q&A

Technical Requirements:

1. The application must include both frontend and backend.
2. Database connectivity is mandatory.
3. REST API architecture is compulsory.
4. Static websites without backend functionality will not be accepted.
5. Code must be written during the event duration.
6. Plagiarism will lead to immediate disqualification.

Suggested Technologies: - Frontend: React / Angular / HTML-CSS-JavaScript - Backend: Node.js / Express / Spring Boot / Django / Flask - Database: MySQL / MongoDB / PostgreSQL.

Evaluation Criteria:

- Problem Understanding – 10%
- Application Architecture & Design – 15%
- Backend Logic & API Design – 20%
- Database Design & Integration – 15%
- Frontend UI/UX – 15%
- Functionality & Performance – 15%
- Code Quality & Documentation – 10%

Rules & Regulations:

1. Use of documentation resources is allowed.
2. Use of AI tools must be declared.
3. Participants must not collaborate or share code.
4. Any malpractice will lead to disqualification.
5. Participants must be present on both days.
6. The decision of the judges will be final and binding.
7. The organizing committee reserves the right to modify the rules if required.
8. Each team must register online through Official Codeathon'26 Website or offline through the event coordinators.
9. All team members must have a valid Codeathon ID and college ID. External participants should submit a Bonafide Certificate signed by their Principal/HOD.
10. . Misbehavior or non-compliance with the event rules may lead to disqualification.
11. The organizing committee reserves the right to modify the rules at any time, with participants informed via email/WhatsApp.
12. The decision of the jury will be final and binding.
